GIT VERSION CONTROLL

I am highly motivated and detail-oriented Front-end developer / UI/UX

Designer with a passion for creating exceptional user experiences. Seeking a position in a software development team where I can utilize my design skills and collaborate with cross-functional teams to deliver innovative and visually appealing digital products. I have creative mindset with a keen eye for detail . I am eager to expand my knowledge and skills and I am confident that my enthusiasm and dedication will enable me to excel in this role.

### Personal Projects

<https://ayat-realstate.netlify.app/>

#### Ayat real state redesign

I conducted research to understand the goals of Ayat's real estate website, and based on my findings, I redesigned the website to be more user-friendly and easier to use. To accomplish this, I used React.js and Tailwind CSS to create a modern and responsive design that is optimized for various screen sizes. The end result is a website that not only looks great but also provides a seamless user experience for visitors.

#### Outlet store

I designed a user-friendly e-commerce website using Figma. The website has a simple and elegant design that is easy to navigate and visually appealing. The website was designed with the goal of providing a positive user experience for customers. The website includes micro interactions that provide a seamless and enjoyable user experience
